Feedback on second/third iteration

1. Add some lofi music in background
    a. Use this lofi spotify playlist and just shuffle through songs: https://open.spotify.com/playlist/0vvXsWCC9xrXsKd4FyS8kM
    b. Make it quiet and ambient but definitely there
    c. Remove the white noise when in home room in toronto

2. Changes for my sprite
    a. Make my skin tone a bit brighter (I look brown right now instead of Chinese)
    b. Change my eyes to what the old sprite had
    c. Don't show my teeth and don't smile

3. Add an interaction for the baked food in my home room:
    a. Press E to eat:
    b. Eating animation - after 2 seconds, sprite says "yum!"

4. When idle, the thought bubbels need to be a lot smaller and less noticeable

5. For the speaker in my room:
    a. Not just dubstep and EDM - also classical music, R&B, hip hop
    b. When pressing E to play: play Sergei Rachmaninoff's Piano Concerto No. 2 in C minor by Valentina Listsa, specifically the ending coda in C major

6. Dorm room still feels a bit too spacious on the top left side
    a. Add a trash bin somewhere
    b. Make the bean bag bigger
    c. Add a laundry basket somewhere with clothes inside
    d. And anything else you think would be nice

7. Hope For Hearing shirt - make it look more like a shirt (looks like a piece of paper right now)

8. Add some more items on my dorm desk: a baseball cap, wired earbuds, a notebook, pens, etc.

9. Have the cat meow randomly, meow when petted, and purr when petted while sleeping on bed

10. For the books on my home room shelf: have the books be centered. Make them a little less thick. Some can be leaning on the side, some can be lying flat down, etc.

11. For the oar on the top shelf, looks like a candy cane right now
    a. Have just the top of the oar face outwards like this with a bit of the handle:

www.coachcoxandcrew.com

12. On the top shelf, add a beach volleyball too
    a. Also add it in the content - like playing beach volleyball in my free time

13. Carpet where longboard is placed looks like a mini-road
    a. Just make it a soft fluffy beige carpet

14. On the bottom right desk in my home room, the camera and speaker look to properly placed. Place them in such a way that they look natural like I would usually in real life. To also make it seem more natural, add a bunch of other miscellaneous items that aren't interactable on that desk: a mug, a notebook, pencils, plant, anything else you think would be nice

15. Make my home bed green and blue plaid

16. Add some wall decor in my home room as well: template holders for posters (for when I download and actually put up the real poster design there)

17. Randomize my caffeine and sleep stats

18. The font of every single “description” when clicked into needs to change, including descriptions in the quick view. It looks too basic and professional right now.

19. Quick view:
    a. Remove the sad face
    b. Again, the font on subheadings and descriptions look far too default and basic and doesn’t match the branding at all
        i. Same with the morning, work, evening, night and play nav bar
    c. For leadership after class:
        i. Make it such that thai section is like a card “gallery” and can also be clicked into like “selected work” section
        ii. Start with Sharpe Fellow Tech VP. put hope for hearing last. Make it such that
    d. Remove the “Same stories as the game, minus the walking.” at the bottom
    e. Also want more dynamic animations wherever possible (but don’t make it too much or over the top)

20. Arrow from dorm to home room looks a bit like a cross right now (extra pixel at the top of the arrow?)
